Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Cecil W. Davison and Mary L. Fant. Anissa D. Cotton provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Current Information and Popular Publications Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, Agriculture and Trade Analysis Systems Branch, Data Services Center.

FOREIGN AGRICULTURAL TRADE OF THE UNITED STATES, FISCAL YEAR 1993 SUPPLEMENT.
Commodity Economics Division, Economic Research Service, U.S. Department of
Agriculture.

ABSTRACT

This statistical reference summarizes current and historical data on U.S. foreign trade in agricultural products. Tables highlight commodity and country information, including values, quantities, principal markets for agricultural exports, and import sources.

LF	Leaf		
L, LV	Loaves		
MACH	Machinery		

SPECIAL NOTICE

This statistical report presents tables showing current and historical data on U.S. foreign trade in agricultural products. Commodity and country information is for the most recent 2-year period. Statistics for fiscal year 1993 are preliminary.

U.S. foreign agricultural trade statistics in this report were derived from official data released by the Bureau of the Census. Agricultural commodities are defined as (1) nonmarine food products and (2) other products of agriculture, including fibers, raw hides and skins, fats and oils, and beer and wine, which have not passed through complex processes of manufacture. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in-transit through the United States from one foreign country to another when documented as such by the U.S. Customs Service.

Trade statistics for selected nonagricultural products, including fertilizer, fish, agricultural chemicals, farm machinery, and manufactured tobacco, are presented at the end of the commodity group tables.

Exports

Export data include "exports of domestic merchandise," defined as commodities grown, produced, or manufactured in the United States, and commodities of foreign origin that have been changed from the form in which they were imported. The export value is generally equivalent to a free-alongside-ship (f.a.s.) value at the U.S. port of export, based on the transaction price and including inland transportation, insurance, and other costs. Agricultural exports have been adjusted for transshipments through Canada based on information provided by the Federal Grain Inspection Service. More than 500 revisions have been incorporated into the 1992 and 1993 tables.

Imports

Import data are "imports for consumption," which include entries for immediate consumption and withdrawals from bonded Customs warehouses. The import value is defined as the "Customs value," based on the foreign market value, export value, or constructed value, and excludes import duties, freight, insurance, and other charges incurred in moving the commodity to the U.S. port.

											145,446

1/ Excludes live animals, hides and skins, and eggs.

2/ Includes flour and bulgur. Not converted to grain equivalents.

3/ Includes soybeans, sunflowerseeds, peanuts, cottonseed, safflowerseed, flaxseed, and nondefatted soybean flour.

4/ Chiefly corn gluten feed, dried beet pulp, citrus pellets, alfalfa meal, and hay.

5/ Includes vegetable oil-based waxes.

6/ Excludes fruit juices.

7/ Primarily grass and vegetable seeds, blended food products, and sugar products.

SUMMARY OF REPORT #AIB-688

Three Forces Drive World Feed Wheat Trade

February 1994

Contact: Sara Schwartz, 202/219-0825

Competitive prices and abundant wheat supplies generally increase trade in wheat for feeding. Certain types of market conditions increase the probability that large volumes of feed wheat will be traded. These market conditions include: damaged wheat in exporting countries that leads to heavy price discounts; abundant total wheat supplies that drive down export prices, often aggravated by fierce and subsidized competition among exporters; and a combination of the first two conditions that lowers relative wheat prices. *World Feed Wheat Trade: A Market Analysis*, a recent report from USDA's Economic Research Service, examines the key factors affecting feed wheat trade and thus develops a framework for evaluating the necessary conditions.

While the annual volume of feed wheat trade fluctuates widely, it has been increasing since the mid-1980's. Although much wheat that is traded and fed is low quality, there is no standard definition of feed wheat; any wheat can be used for feeding. Trade accounts for only

a small and irregular portion of world consumption of wheat for feed, but feed wheat trade critically affects the volume of total wheat and coarse grain trade.

The world market for feed wheat is relatively small, with few countries importing wheat for feed, even in years when relative prices are attractive. Policy impediments and other factors, such as the irregular availability of low-priced wheat, restrict import demand. The world market is undergoing some structural change because of reduced demand by the former Soviet Union (FSU) and Eastern Europe, major importers in the past. Because of reforms and economic changes, the livestock sectors in these countries are contracting, and feeding of all grains is declining. In the short term, this will further increase the dominance of South Korea, which now has close to monopsony power in the world market. Other countries could import more feed wheat, but this would require more flexibility in imports or policy changes.

South Korea is currently the world's largest feed wheat importer, and is extremely price responsive and flexible in its purchases of grains for feed. This responsiveness and flexibility lead to considerable volatility in South Korea's annual import patterns. In South Korea, feed wheat imports mainly compete with corn.

Australia, Canada, and the European Community (EC) are the major exporters of feed wheat, although their annual export patterns are highly variable. Australia's and Canada's feed wheat exports are largely associated with weather-related damage to crops. Within the EC, there are large trade flows of feed wheat. The EC normally produces a large amount of low-quality wheat. In addition, bad weather occasionally damages EC wheat. EC feed wheat exports to other destinations are not always clear, because its trade data do not consistently distinguish exports of feed wheat from those of milling wheat. Some feed wheat is also sold by smaller exporters, such as Turkey and some East European countries. The United States does not generally export wheat for feed.

In the long term, trade liberalization and the reform of the EC's Common Agricultural Policy (CAP) are likely to reduce wheat for feed exports, especially from the EC. World prices for wheat would tend to increase as subsidized exports shrink due to the General Agreement on Tariffs and Trade (GATT). And, more wheat would likely be fed within the EC because of CAP reform changes that lower internal grain prices. Weather, rather than policies that distort wheat export prices, will then consistently be the most important factor determining wheat for feed supplies in the world market.

Ongoing structural adjustments in Eastern Europe and the FSU will likely continue to constrain growth in future import demand for feed wheat. However, some countries that currently discourage wheat for feed imports might increase imports under trade liberalization, which could lead to reduced state trading and more flexibility in import decisions.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal opportunity employer.
